## GERMAN CRITICISM.

(From the Daily News Correspondent.)  
 It is a curious thing that the German people have been so long in coming to the English people. There was a time, and not a very long one, when men and things were so different that the English people were almost entirely ignorant of the German people. Our knowledge was limited to the fact that there was a German people, and that they were different from us. But now, thanks to the progress of civilization, and to the influence of the English people, the German people are becoming more and more known to us. We are beginning to see that they are not so different from us as we once thought. We are beginning to see that they are a people of great intelligence and great energy. We are beginning to see that they are a people who are capable of great achievements. We are beginning to see that they are a people who are worthy of our respect and our admiration.

THE PREVENTION OF HYDROPHOBIA.  
 A means of preventing hydrophobia has been suggested by a veterinary surgeon of Paris. It has been proposed that the blood of dogs should be treated with a certain amount of alcohol, and that the treated dogs should be kept in a certain way. This method is said to be very effective, and it is hoped that it will be adopted by the authorities. It is a very interesting suggestion, and it is one that should be carefully considered.

CHRISTIAN EVIDENCE AND AFFIDAVIT.  
 The fourth annual meeting of the Christian Evidence Society was held in the rooms of the Society, on the 18th inst. The meeting was attended by a large number of persons, and it was a very successful one. The Society has been very active in its work, and it has been able to secure a large number of converts. It is a very interesting and important work, and it is one that should be carefully considered.
